

GTM LABS – Operating Brief (v1)

Last updated: {{Oct-14}}

1) What GTM LABS Is

GTM LABS is a productized content service that turns a single webinar or long-form recording into a full content library and an always-on growth loop. We specialize in:

- **Webinar repurposing** → clips, posts, blogs, newsletters, lead magnets.
- **Long-form video repurposing** (podcasts, conference talks, demos).
- **Lightweight distribution** (scheduling, baseline analytics) with an optional **Full-Funnel Analytics** add-on for attribution and funnel measurement.

Positioning in 1 sentence: **“Turn one webinar into 30+ assets that grow your list and the next webinar.”**

2) Core Offers

A. Free Audit (no integration required)

Input a YouTube URL → we deliver a mini content library (typically 15+ assets) so prospects can see our quality. **Output:**

- 8–10 short clips (vertical + horizontal variants)
- 6–8 social posts (copy + image prompts)
- 1 short blog (~600 words)
- 1 lead magnet draft (outline + designed PDF cover, content draft)
- Optional: if the prospect connects accounts, we can schedule posts and show baseline analytics from the demo content

Notes:

- No landing page build in the audit. For the lead magnet we provide the PDF + copy; customer (or our add-on) hosts and captures emails.
- Audit turnaround target: 2 business days from link submission.

B. Standard Plan – “Repurpose & Distribute”

Price: \$1,738/month **Scope:**

- Up to **2 webinars/long videos per month** (≤120 minutes total source content)
- **30+ assets per source:** 8–12 clips, 6–10 social posts, 1 blog, 1 newsletter draft, 1 lead magnet draft when relevant
- **Scheduling & publishing** to connected social accounts

- **Basic analytics:** per-platform and per-post KPIs, monthly roll-up (impressions, views, clicks, engagement rate)
- **Unlimited revisions** on produced assets during the active month
- **Client portal (invite up to 3 teammates)** for review, approvals and collaboration.

SLA (summary): 48-hour first draft of core assets; 72-hour revision cycles (Mon–Fri); 24-hour response on urgent questions. Fair use: pricing covers ≤120 min source video/month; additional hours via add-on. Service credits apply if we miss stated turnarounds for reasons in our control.

C. Founding Partner Pilot (limited to 2)

Price: \ \$795/month for 6 months, then converts to \ \$995/month. **Scope mirrors Standard Plan** with the same SLA and fair-use.

Microcopy for pricing page: “Add-ons available at checkout and in your portal.”
 “View details” opens the SLA modal with response times, fair-use, and credits.

3) Add-Ons

Advanced Analytics Pack – \ \$900/month

- UTM parameters on all posts
- GA4 events for lead magnet downloads and/or form submissions
- Auto reports: weekly/bi-weekly/monthly **funnel** (post → landing page → download → subscriber) and **source attribution** by platform/campaign
- Shareable dashboard + weekly highlights email

Landing Page Build – \ \$300 one-time

- Quick, branded landing page for lead magnets or webinar RSVP
- Hosted on Vercel (fast, mobile first). Default preview lives on a vercel.app URL; we can map a custom subdomain via a simple DNS update (we provide the records or coordinate with your team).
- Can also hand off assets to customer’s CMS if preferred

Extra Source Hours – \ \$200 per additional 30 minutes

- For months with >120 minutes of total source content
- Typical add-on covers 1 extra batch of clips and copy from the same recording.

Campaign Sprint (Seasonal/Launch) – \ \$1,200–\ \$2,000 one-time for 30 days

- Purpose-built for bursts around launches, seasons, or conferences
- Up to **3 webinars in 30 days** with **48-hour** draft turnaround per session
- Daily scheduling during the window + lightweight **campaign dashboard**
- Optional extended approvals window (evenings) during the sprint

4) Process (48-Hour Library)

1. **Upload:** client submits recording link + context
2. **Transcribe & analyze:** AI + human pass to extract angles
3. **Create:** 30+ assets packaged by channel
4. **Review:** client And/or team comments in the portal; we revise
5. **Schedule:** connect socials; we publish to calendar
6. **Measure:** basic analytics in Standard; funnel analytics as add-on

Artifacts: content doc, clip queue, post calendar, analytics snapshot, optional dashboard link.

5) What We Deliver (by asset)

- **Short clips:** 8–12 per source, mixed aspect ratios, burned-in captions, headline frames
 - **Social posts:** LinkedIn-first copy, X/Threads variants, image prompts or simple cards, carousel
 - **Blog:** 600–1,000 words (audit uses ~600); SEO-friendly headings; internal link prompts
 - **Newsletter:** 1 issue per source; value summary + CTA to next event/lead magnet
 - **Lead magnet:** outline + draft PDF; design pass included; landing page via add-on
-

6) Ideal-Fit Customer Profile (IFCP)

Firmographic fit

- B2B SaaS or tech-enabled services
- 20–300 employees (seed to growth-stage)
- At least 1 webinar/long-form session per month (or a sizable back catalog)
- Posting cadence category: High velocity ($\geq 2/\text{mo}$), Monthly ($1/\text{mo}$), Occasional ($1\text{--}2/\text{quarter}$), Dormant ($\leq 2/\text{year}$), **Seasonal/Launch-driven (bursts in a 4–8 week window)**
- Existing social presence; email list $\geq 2\text{k}$ preferred

Situational fit

- Small content team; velocity constrained
- Targeting demand gen, list growth, and webinar attendance
- Comfortable with AI-assisted production and a productized retainer

Red flags

- No content owner; approvals take >2 weeks
 - No access to social accounts (cannot schedule)
 - No tolerance for turnaround SLAs
-

7) Personas (buying committee)

- **CMO / VP Marketing:** cares about pipeline, list growth, cost per MQL, proof of impact.
Message: "Repurpose → measurable funnel to subscribers and sign-ups."
 - **Head of Content / Content Marketing Manager:** cares about velocity, brand voice, calendar.
Message: "30+ on-brand assets in 48 hours; you keep strategy; we fill the queue."
 - **Demand Gen / Growth:** cares about UTMs, GA4, landing pages, attribution.
Message: "Funnel reporting from post to subscriber; see which posts convert."
 - **Founder/CEO (early stage):** cares about leverage, consistency, time.
Message: "Turn recordings into momentum without hiring a team."
 - **Non-decision maker (specialist/manager):** cares about help and partnership.
Message: "We make you look like a hero; painless reviews; unlimited edits."
-

8) Messaging Pillars

1. **Mileage:** one recording → a month of content.
2. **Momentum:** each drop promotes the next webinar.
3. **Measurable:** posts → clicks → downloads → subscribers.
4. **Minimal lift:** upload, approve, and we do the rest.

Rotating hero line pattern (5-word stem): "Repurpose into..." → **clips, posts, blogs, newsletters, lead magnets, sign-ups.**

9) Website Structure (condensed)

- **Hero:** "Turn one webinar into 30+ pieces of content." Sub: "We transform recordings into clips, posts, blogs, newsletters, and lead magnets." CTA: "Get a free content audit."
 - **Alternating features:** Builder → Branding → Analytics → Personalization (adapted to our service).
 - **Tabbed section:** Process | Flywheel | Results (animated components).
 - **Pricing:** Standard + Founding Pilot; add-ons drawer; SLA link; FAQ.
 - **CTA:** URL input + calendar embed + short form.
-

10) Pricing Strategy (summary)

- Core plan at **\$1,738** anchors value; pilot at **\$795 for 6 months** de-risks buying and creates urgency (only 2 slots).
 - Clear **fair-use** guardrail (≤ 120 min source) + **Extra Source Hours** add-on protects margins.
 - **Advanced Analytics Pack** as recurring add-on separates "make" from "measure" investment.
-

11) Sales GTM / Outreach

Primary channel: LinkedIn + YouTube discovery.

Segmentation by posting cadence

- **High-cadence** ($\geq 2/\text{mo}$): "Squeeze more from each session; grow the list."
- **Steady** ($1/\text{mo}$): "Keep momentum between webinars."
- **Occasional** ($\leq 1/\text{quarter}$): "Resurrect the library; build a flywheel."
- **Unclear strategy**: "Low-lift trial; see the preview."
- **Seasonal / Launch-driven** (2–6 in 4–8 weeks, then quiet): "48-hour sprint to carry momentum through the window."

Seasonal / Launch-Driven playbook

- **Pattern**: Spikes tied to launches, seasons, conferences, new regs; quiet after.
- **Who**: Tax/finance, HR/benefits, ecommerce/martech, edtech, cybersecurity/IT, devtools/data/AI, some public companies.
- **Find**: Clustered YouTube uploads; /events pages with multiple sessions; release notes; conference sponsor lists; seasonal keywords (Open Enrollment, Year-End Close, Back-to-School, Holiday Prep, Tax 2025, "What's new in vX.Y").
- **Prospecting queries**:
 - `site:youtube.com "<brand>" webinar 2025`
 - `site:<brand>.com/events webinar`
 - `site:linkedin.com/events "<brand>" webinar`
 - `"<brand>" "what's new" webinar`
- **Hook**: "I see you're stacking webinars around \<season/launch>. I can turn each session into clips, posts, a short blog, and a newsletter **inside 48 hours** so momentum carries through your window. Want a quick preview from last week's recording before the next drop?"
- **Offer tweak**: Add **Campaign Sprint** add-on; guarantee 48-hour turnarounds; daily scheduling; lightweight weekly momentum snapshot.
- **KPIs during window**: weekly output, scheduled posts, CTR, downloads, **net new subscribers**, and **next-webinar RSVPs**.

Three-wave company outreach (per company)** (per company)

- **Wave A1**: 1 decision maker (CMO/VP). Connection → short DM → 30-sec voice note → nudge.
- **Wave A2** (starts +5–7 days): second DM to another decision maker.
- **Wave A3** (starts +10–12 days): partner persona (Head of Content / Demand Gen).

Rule: if anyone from Company X replies/books, pause the other Company X leads (do not stop campaigns globally).

Voice-note spine (unpersonalized)

"Quick idea after seeing your webinars on YouTube. We turn one recording into clips, posts, a short blog, and a newsletter that promotes the next webinar. It keeps momentum and grows

email sign-ups over time. If it helps, we can repurpose one past session and send a free preview so you can react. Would you be against that?"

Pre- and post-DM snippets

- Pre: "Saw a recent webinar on your channel and had a thought on getting more mileage. Short voice note next."
- Post: "Just dropped a quick voice note. If a preview helps, I can send it this week."

12) Intake / Qualification

On the site audit form:

- First, Last, Company email
- Company, URL to recording
- Goal focus (pick one): list growth, webinar sign-ups, product education
- Brand voice reference (URL or upload)
- Must-avoid topics (optional)

Nice-to-have: audience segment, ICP description, next scheduled webinar date.

13) Analytics & KPIs

Basic (included): per-platform and per-post KPIs, monthly roll-up (impressions, views, clicks, CTR, engagement rate). **Advanced Pack:** UTMs, GA4 events, landing-page conversion rate, downloads, new subscribers, source/medium and post-level attribution, funnel view. **Seasonal windows:** add a simple weekly **momentum snapshot** (output produced, posts scheduled, clicks, top clip) even without Advanced.

North-star: **Net new email subscribers** per source and **webinar sign-ups**.

14) Tech Stack

- **Repurposing+transcript:** We're using a platform called Minvo.pro, This creates the social media clips, the short-form video clips, and also the blog post.
- **Scheduling/Publishing:** We're using MyMarky white-labeled, so we're able to bring them on and host it in, and it looks like it's our platform. We're able to connect to their social media accounts easily, and then it schedules out and also creates all of the social media posts, LinkedIn post carousels, Twitter, Instagram, Facebook, Pinterest.
- **Landing Pages:** Vercel + forms You (The form is React JavaScript created by us Using AI or an AI IDE.) or client CMS
- **Analytics:** GA4 + Looker Studio; Bitly or Rebrandly for link tracking
- **Automation:** Active pieces.

- **Portal:** Shared content workspace for review/approvals. We're using usequeue.com For the client portal.
-

15) Ops SOP (high level)

- T-0: Intake received → project in tracker Which is usequeue→ I put the link in MinVo and also in MyMarky, and it generates pretty much like 90% of the content within 10 minutes
 - T-24h: Editing and making fine adjustments to meet brand guidelines.
 - T-48h: First asset bundle delivered
 - Revisions: 72-hour cycles
 - Month-end: analytics snapshot; if Advanced Add-on, publish dashboard + summary
-

16) Risks & Mitigations

- **Brand voice mismatch** → collect reference posts; 1st-week calibration call.
 - **Approval delays** → remind cadence; “auto-publish unless changes by X date” option.
 - **Overage risk** → enforce fair-use and extra hours add-on.
-

17) FAQ Seeds

- How fast is turnaround? 48 hours for core assets; 72 hours per revision round.
 - Can you match our brand voice? Yes—provide samples; we calibrate in week one.
 - Do you handle landing pages? Yes via add-on or we support your CMS team.
 - How do you measure? Basic KPIs included; Advanced Add-on adds funnel and attribution.
 - Can we request edits? Unlimited during the active month.
-

18) Roadmap Ideas

19) Success Metrics (internal)

- Audit → paid conversion rate
 - Average clips per source and approval time
 - Subscriber growth per source (with Advanced add-on)
 - Retention and add-on attach rate
-

20) One-liners you can reuse

- “From webinar to content library in 48 hours.”

- “Clips, posts, blogs, newsletter—every recording, fully used.”
- “The content flywheel that grows your email list and your next webinar.”
